

Line Follower and Maze Solver Robot Competition Official Guidelines and Mechanics

General Guidelines

1. Each contestant must use **only one robot** for both the Line Follower and Maze Solver competitions.
2. The **robot must be fully assembled**, with all connections secured and screws properly tightened, during the **Calibration Day (May 1, 2026)**.
3. Contestants must prepare and **finalize two separate codes or sketches**:
 - **One for the Line Follower**
 - **One for the Maze Solver**
4. **All coding, testing, and modifications must be completed before the competition.**
5. No editing, fixing, or changing of codes will be allowed upon the start of the competition. **Only uploading** of the finalized sketches **is permitted**.
6. The order of participation will be determined through a draw lots.
7. Any violation of these rules will result in disqualification.
8. The decision of the judges is **final and irrevocable**.

Line Follower Competition Mechanics

1. A **three (3) minute** grace period will be given to all contestants to complete the upload before proceeding with Line Track.
2. **Only uploading of code is allowed.** Any code modification is strictly prohibited.
3. Each contestant will be given **three (3) official trials**.
4. The track contains **ten (10) stars** placed at various points.
5. Each star is worth **ten (10) points**, for a maximum score of one hundred (100) points per trial.
6. The robot must be positioned at the starting line before each trial.
7. The robot **must only be activated** after the adjudicator signals **"GO."**

Violations During a Trial

A trial will be considered unsuccessful if:

- **The robot goes off track.**
- **The contestant touches the robot while the trial is in progress.**

Scoring

1. The score and time for each trial will be recorded.
2. The contestant with the **highest average score across all three trials will be declared the winner.**
3. **In case of a tie**, the contestant with the fastest average recorded time will win.

Maze Solver Competition Mechanics

1. The Maze Solver competition will immediately follow the Line Follower event.
2. Contestants will be given **three (3) minutes** to upload their finalized Maze Solver code.
3. Only **uploading of code is allowed**. Any code modification is strictly prohibited.
4. Each contestant will be given one (1) official trial.
5. The robot must be placed at the designated starting point.
6. The robot may only be activated after the adjudicator signals "GO."
7. The fastest robot to successfully solve the maze will be declared the winner.

Intervention Rules

1. Each contestant is allowed a maximum of three (3) interventions during the trial. Interventions may be used to adjust the robot's direction or position only if:
 - **The robot becomes stuck, or**
 - **The robot repeatedly moves in the same pattern or direction at least three (3) consecutive times.**
2. Each intervention carries a **thirty-second (+30 seconds) time penalty**.

Robot Adjustments

Physical adjustments or repairs during the trial, including tightening screws, fixing wheels, or reconnecting loose components, are allowed but will incur an **additional thirty-second (+30 seconds) penalty per adjustment**.

Important Reminder

Contestants are expected to demonstrate sportsmanship, honesty, and professionalism throughout the competition. Any unsportsmanlike conduct may result in disqualification.
